Professional Summary

Data Analyst with 3 years of experience in IT operations, specializing in backup and storage support, system monitoring, and SLA reporting. Hands-on project experience with Power BI, SQL, Excel, DAX, Tableau, and Power Query to perform data cleaning, modeling, and visualization, transforming operational data into actionable insights. Strong analytical mindset, experience working with teams, and a proven commitment to continuous learning and improving data analysis skills.

Skills

- **BI & Analytics:** Power BI, Tableau, Excel, DAX, Power Query
- **Databases:** SQL, MySQL
- **Cloud Platforms:** AWS, Microsoft Azure
- **IT Operations & Infrastructure:** ServiceNow, Commvault, Rubrik, NetApp, Pure Storage
- **Programming & AI:** Python, Generative AI, AI Agents, Streamlit
- **Technical Concepts:** ETL, Data Modeling, KPI Analysis, Data Governance

Work Experience

Atos Global IT Solutions and Services Private Limited

Senior Associate Engineer

Sept 2022 – Sept 2024

- Monitored and optimized backup and storage environments supporting 100+ servers, ensuring 99%+ data availability and resolving issues to minimize downtime.
- Administered backup platforms Rubrik and Commvault, performing daily backup and restore operations, new build server configurations, decommissioning activities, and handling SnapVault backup failures for 100+ scheduled jobs.
- Worked on user-raised incidents and service requests, resolving 20-30 issues per week and ensuring timely SLA-compliant resolution.
- Worked and coordinated with Active Directory and Varonis teams to support internal tools and maintain seamless operations across the IT infrastructure.
- Designed, developed, and maintained daily and weekly Commvault and Rubrik reports and dashboards, providing insights into backup performance, status, and success rates.
- Handled NetApp file-level backups and restores for 50+ users, ensuring reliable data protection and quick recovery for end users.
- Configured and maintained storage, media management, and deduplication policies for 100+ backup jobs across APAC, EMEA, and AMER regions, troubleshooting CommServe console issues, and maintaining backup schedules to improve backup performance.
- Implemented 20+ change requests via ServiceNow, performing impact analysis and presenting data-backed proposals during CAB meetings for timely and efficient implementation.

Associate Consultant

Sept 2021 – Sept 2022

- Monitored and managed a ServiceNow queue handling 10–15 support tickets per day, ensuring 95%+ SLA compliance and minimal system downtime.
- Prepared and distributed daily and weekly backup performance reports covering 50-100+ backup jobs, providing insights into job success rates, failures, and system availability.
- Reviewed backup and storage performance data to identify recurring failure patterns, contributing to a 10–15% reduction in repeat incidents through continuous follow-ups.
- Provided technical support for backup and storage systems across 100+ servers, resolving incidents and service requests within defined SLAs.
- Collaborated with 2-3 cross-functional teams to communicate the incident trends, system health metrics, and resolution progress, supporting operational decision-making.

Projects

1. Classic Models Sales Analysis Dashboard

- Developed an end-to-end Power BI sales analytics dashboard by integrating 6 relational MySQL tables and creating SQL views to analyze \$9.6M+ in sales across 323 customer orders.
- Built advanced DAX measures including MTD, YTD, and MoM growth calculations to track sales performance, profitability trends, and average order value (\$29.65K).
- Designed interactive multi-page dashboards with decomposition trees, KPI cards, bookmarks, slicers, and interactive measure toggles to analyze product demand, customer behavior, and regional sales distribution.
- Performed data modeling and business analysis to identify top-performing product lines (Classic Cars: \$3.85M sales) and highest-value customers, improving reporting clarity and executive-level decision support.

Tools : MySQL, SQL, Power BI, DAX, Power Query, Data Modeling

2. DiabetesPulse – AI-Powered Diabetes Risk Prediction System

- Created a dual-agent healthcare application using a Random Forest classifier and Google Gemini 2.5 Flash API to predict diabetes risk and generate AI-based health explanations with lifestyle recommendations.
- Trained and deployed a machine learning model on the 700+ record Pima Indians Diabetes dataset using Scikit-learn, enabling probability-based risk classification from patient health indicators including glucose level, blood pressure, age, and pregnancies.
- Implemented an interactive Streamlit web application integrated with REST APIs to deliver real-time predictions with risk probabilities up to 85%, automated analysis, and generative AI explanations to improve healthcare prediction interpretability.

Tools : Python, Scikit-learn, Pandas, NumPy, Streamlit, Gemini API, REST APIs, Machine Learning

3. Washington EV Analysis Dashboard | Tableau

- Analyzed and created an interactive Washington State EV registration dataset containing 100K+ EV records to identify adoption trends by manufacturer, county, vehicle type, and model year using Tableau visualizations.
- Constructed an interactive dashboard with 5 interactive visualizations, maps, charts, and manufacturer-based filters to examine EV distribution patterns across 10+ counties and regional adoption trends in Washington State.
- Identified key insights including Tesla leading EV registrations (59,485 registrations) and King County recording the highest EV concentration (6,402 registered EVs), highlighting the rapid growth of electric vehicle adoption.

Tools : Tableau, Excel, CSV, Geospatial Analysis, Data Visualization

Certification

- Microsoft Certified: Azure Fundamentals
- AWS Certified Solutions Architect – Associate
- AWS Certified Cloud Practitioner
- 5-Day AI Agents Intensive Course with Google — Kaggle
- Cambridge English Certification (Business Preliminary)

Education

S.A. Engineering College, Anna University — Chennai, Tamil Nadu

Bachelor of Engineering (B.E.), Computer Science & Engineering

2017 – 2021 | CGPA: 8.4

Languages

- English — Professional Proficiency
- Tamil — Native Proficiency
